

WHAT IS CLAIMED IS:

1. The combination of:
 - (a) a faceplate; and
 - (b) a storage device coupled to said faceplate, said storage device being adapted to retain a portable electric appliance.
2. The combination as claimed in claim 1 wherein said storage device is removably coupled to said faceplate.
3. The combination as claimed in claim 1 wherein said faceplate is adapted to partially cover an electrical device.
4. The combination as claimed in claim 3 wherein said faceplate is adapted to partially cover an electrical receptacle having one or more outlets.
5. The combination as claimed in claim 1 wherein said storage device is shaped to include an opening.
6. The combination as claimed in claim 1 wherein said storage device comprises a front panel, a rear panel, a pair of side panels and a bottom panel which together partially define an interior cavity.
7. The combination as claimed in claim 6 wherein the bottom panel of said storage device is shaped to include an opening.

8. The combination as claimed in claim 7 wherein said storage device is adapted to retain a portable electric appliance within its interior cavity.
9. The combination as claimed in claim 1 wherein said faceplate includes a fastening device.
10. The combination as claimed in claim 9 wherein said storage device includes at least one fastening device which is adapted to engage the fastening device on said faceplate.
11. The combination as claimed in claim 10 wherein the at least one fastening device on said storage device is sized and shaped to releasably engage the fastening device on said faceplate.
12. The combination as claimed in claim 11 wherein the fastening device on said faceplate is in the form of a bracket.
13. The combination as claimed in claim 12 wherein the at least one fastening device on said storage device is in the form of a hook.
14. The combination as claimed in claim 12 wherein the fastening device on said faceplate is shaped to define a slot.
15. The combination as claimed in claim 14 wherein the at least one fastening device on said storage device is sized and shaped to fittingly protrude into the slot formed in the fastening device on said faceplate.

16. The combination as claimed in claim 9 wherein said faceplate includes a cover and a flange which are integrally formed together.

17. The combination as claimed in claim 16 wherein the cover of said faceplate includes a substantially flat front surface.

18. The combination as claimed in claim 17 wherein the flange of said faceplate extends generally orthogonally out from the flat front surface of the cover.

19. The combination as claimed in claim 18 wherein the fastening device on said faceplate is integrally formed onto the flange.
